

# Controlling Structure Formation in Soft Materials

2025

**Workshop:** October 7 – 9

**Pre-Workshop for Young Researchers:** October 6

This interdisciplinary workshop aims to advance our understanding of structure formation and self-organization in soft materials from supramolecular to colloidal systems, focusing on the interplay of experiments and computational modeling.

## Topics:

- Dissipative & Non-Equilibrium Assemblies
- Multiscales Assemblies
- Fluid Interfaces

- Supramolecular Functional Materials
- Polymer Brushes
- Molecular Engineering

## Invited Speakers:

**Giulia Celora** (University of Oxford)  
**Sissi de Beer** (University of Twente)  
**Svenja Hövelmann** (Kiel University)  
**Gerhard Hummer** (MPI-Biophysics, Frankfurt)  
**Angelika Kühnle** (Bielefeld University)

**David Lynn** (Emory University, Atlanta)  
**Marcus Müller** (Göttingen University)  
**Roland Netz** (Free University of Berlin)  
**Paulo Telles de Souza** (ENS Lyon)  
**Jacopo Vialletto** (University of Florence)  
**Paul van der Schoot** (TU Eindhoven)

For more information on the workshop and registration visit  
<https://grk2516.uni-mainz.de/workshop-2025/>

**Location:**  
*Schulz-Horner Building, JGU*  
*Campus*  
*Lecture Hall C03-C02*

**Research Training Group**  
**Structure Formation of**  
**Soft Matter at Interfaces**
